

## Press release

# RWE receives building permits for F.E.W. Baltic II offshore wind farm

- **Two building permits cover construction of offshore wind turbines along with inter-array and telecommunications cables and offshore substation for RWE's F.E.W. Baltic II offshore wind farm**
- **Offshore wind project is progressing on schedule; commissioning planned by end of decade**

Gdynia, 3 December 2024

**The Voivode of West Pomerania has issued two key decisions to enable the F.E.W. Baltic II offshore wind farm to proceed. This includes granting the building permit for offshore wind turbines along with inter-array and telecommunications cables and offshore substation for RWE's F.E.W. Baltic II offshore wind farm.**

**Tomasz Kreft, Team Lead Offshore Consenting at RWE:** "We have obtained the building permits for our offshore wind farm. This is a very important milestone for the whole F.E.W. Baltic II project. We plan to obtain all remaining building permits in the first quarter of 2025. These documents will allow us to continue with our first offshore wind project in the Polish Baltic Sea as planned."

The scope of the project covered by the decisions includes:

- offshore wind turbines,
- inter-array and telecommunication cables connecting the offshore wind turbines with each other and the groups of wind turbines with the offshore substation,
- an offshore substation that will serve to transform and transmit the energy generated by the offshore wind turbines to land.

The 350-MW F.E.W. Baltic II offshore wind farm project is being developed some 50 km offshore in the Polish part of the Baltic Sea, north of the town of Ustka, and covers an area of approx. 41 km<sup>2</sup>. In 2021, the Energy Regulatory Office granted RWE a Contract for Difference (CfD), subject to approval by the European Commission. Seabed surveys were completed, and both geophysical surveys and preliminary geotechnical surveys were carried out by Polish contractors. The F.E.W. Baltic II project is at an advanced stage of preparation, pending further decisions and administrative approvals.

**RWE**

RWE is leading the way to a clean energy world. With its investment and growth strategy Growing Green, RWE is contributing significantly to the success of the energy transition and the decarbonisation of the energy system. Around 20,000 employees work for the company in almost 30 countries worldwide. RWE is already one of the leading companies in the field of renewable energy. RWE is investing billions of euros in expanding its generation portfolio, in particular in offshore and onshore wind, solar energy and batteries. It is perfectly complemented by its global energy trading business. RWE is decarbonising its business in line with the 1.5-degree reduction pathway and will phase out coal by 2030. RWE will be net zero by 2040. Fully in line with the company's purpose - *Our energy for a sustainable life.*

**Forward-looking statements**

*This press release contains forward-looking statements. These statements reflect the current views, expectations and assumptions of management, and are based on information currently available to management. Forward-looking statements do not guarantee the occurrence of future results and developments and are subject to known and unknown risks and uncertainties. Actual future results and developments may deviate materially from the expectations and assumptions expressed in this document due to various factors. These factors primarily include changes in the general economic and competitive environment. Furthermore, developments on financial markets and changes in currency exchange rates as well as changes in national and international laws, in particular in respect of fiscal regulation, and other factors influence the company's future results and developments. Neither the company nor any of its affiliates undertakes to update the statements contained in this press release.*
