

Press release

RWE is taking big steps forward in expanding its Polish solar business

- **Solar plants with a total capacity of more than 100 MWac under construction in Poland**
- **RWE commissions 8.5-MW solar farm in central Poland, which will be able to supply up to more than 4,300 Polish households**

Warsaw, 31 July 2024

RWE is constructing solar farms with a total capacity of more than 100 megawatts (MWac) across Poland. The first project has now been commissioned. The Bojanowo East ground-mounted photovoltaic farm with a capacity of 8.5 MWac is located in the Wielkopolskie region in central Poland, where RWE has installed more than 17800 solar modules that are able to supply green electricity to more than 4,300 Polish households annually.

Katja Wünschel, CEO RWE Renewables Europe & Australia: “Bojanowo East is a great milestone for RWE’s solar expansion in our Polish core market. It is the first project in a whole series of solar parks we are currently building across the country to be put into operation. We leverage Poland’s sunny conditions with good locations for solar energy and are keen to further support the Polish energy transition.”

Solar growth for a better environment

The solar projects that RWE is currently building in Poland are spread over almost all parts of the country and range from ground-mounted systems with less than one MWac to large solar parks with more than 10 MWac. As sustainability is key to RWE’s growth strategy, the company is working with the Adam Mickiewicz University in Poznan to carry out a biomonitoring [pilot project](#) which will study how favourable conditions for biodiversity can be created at solar farms. The company has therefore put pro-environmental treatments in place at ten selected photovoltaic farms in Poland to provide a beneficial habitat for insects.

RWE in Poland – a key driver of the energy transition

RWE is a key player in the Polish renewables market. RWE Renewables Poland operates wind farms with a total installed capacity of 541 MW and a total solar capacity of 54 MWac, and is developing further green projects. Building on its long-established renewables business in Poland, RWE is currently developing its first Polish offshore project, which is the [F.E.W. Baltic II](#) offshore wind farm.

RWE

RWE is leading the way to a green energy world. With its investment and growth strategy Growing Green, RWE is contributing significantly to the success of the energy transition and the decarbonisation of the energy system. Around 20,000 employees work for the company in almost 30 countries worldwide. RWE is already one of the leading companies in the field of renewable energy. Between 2024 and 2030, RWE will invest 55 billion euros worldwide in offshore and onshore wind, solar energy, batteries, flexible generation, and hydrogen projects. By the end of the decade, the company's green portfolio will grow to more than 65 gigawatts of generation capacity, which will be perfectly complemented by global energy trading. RWE is decarbonising its business in line with the 1.5-degree reduction pathway and will phase out coal by 2030. RWE will be net-zero by 2040. Fully in line with the company's purpose - Our energy for a sustainable life.

Forward-looking statements

This press release contains forward-looking statements. These statements reflect the current views, expectations and assumptions of management, and are based on information currently available to management. Forward-looking statements do not guarantee the occurrence of future results and developments and are subject to known and unknown risks and uncertainties. Actual future results and developments may deviate materially from the expectations and assumptions expressed in this document due to various factors. These factors primarily include changes in the general economic and competitive environment. Furthermore, developments on financial markets and changes in currency exchange rates as well as changes in national and international laws, in particular in respect of fiscal regulation, and other factors influence the company's future results and developments. Neither the company nor any of its affiliates undertakes to update the statements contained in this press release.
